

DUAL-FUEL CONVERSION KIT

For Engines

KOHLER[®]
IN POWER. SINCE 1920.

One Kit, TWO FUEL OPTIONS.

Gasoline or propane. Now you can give customers fuel flexibility and convenience with the Dual-Fuel Engine Conversion Kit*. Thanks to a specially designed carburetor, KOHLER® horizontal gas engines can operate on two different fuels. Once installed, the user just turns the dial to fuel with gasoline and propane. Today many contractors are using gasoline in their portable generators and utility equipment. They'll appreciate the flexibility to connect to propane at home or on the job—especially if a power outage creates fuel shortages.

EASY-TO-INSTALL CONVERSION KIT

- Kit can be ordered and installed by OEMs, distributors and dealers

BENEFITS OF PROPANE

- Clean-burning propane reduces harmful carbon emissions
- Odorless and nontoxic—no gasoline smell
- More cost-efficient than gasoline

*Kit can be installed on KOHLER Command PRO® models CH395DF/CH440DF.

For more information, contact your KOHLER source of supply. Kohler Co. reserves the right to make modifications without prior notice.
